         The most anticipated Ai tool the GPT-4 is released 2 days before<br />
         with great advancements than its earlier version GPT-3.

    <h1>What is <em>GPT-3</em> aka <em>chatGPT?</em></h1>
    <p>
      <i>
        GPT-3 is a powerful and advanced Ai model created by openAI company.
        <br />
        chatGPT is on other hand a GPT-3 powered Ai chatbot application.
        <br />
        It is not a typical chat BOT application you see on some websites.
        <br />
        chatGPT can do more interesting kinds of stuff. <br />
        For dramatically saying it can write whatever you want. <br />
        I swear above 65% of people reading this might know about chatGPT
        <br />
        since it went viral this year.
